EIR Findings

➤ Areas requiring mitigation:

- Aesthetics – potential impacts to scenic vistas
- Biological Resources – potential construction impacts to nesting habitats and native animal species
- Cultural Resources and Tribal Cultural Resources – potential for unanticipated discovery of cultural or tribal cultural resources
- Geology – potential for unanticipated discovery of paleontological resources
- Hazards and Hazardous Materials – potential reasonably foreseeable upset and accident conditions during construction
- Transportation – potential construction related impacts to circulation systems

Mitigation Measures

➤Aesthetics

- No feasible mitigation measures regarding effects on scenic vistas (significant and unavoidable impact)

➤Biological Resources

- MM BIO-1: Requires a pre-construction clearance survey for nesting birds and monitoring

➤Cultural Resources and Tribal Cultural Resources

- MM CUL-1: Requires an archeologist to conduct Worker's Environmental Awareness Program training for archaeological sensitivity and coordination with the Native American Heritage Commission if resources are encountered.
